List of Contents

Aim of experiment:

Results:

Include circuit diagrams associated with results obtained. For example, in lab 1:

Exercise 1:

Step 1: Single-phase transformer measurements

Draw Figure 3 (as given in lab manual 1). Add proper caption and figure number.

Present results as asked in step 6, 7,8 and 9.

Step 2: Determining the ratio of primary current to secondary current.

Draw Figure 4 (as given in lab manual 1). Add proper caption and figure number.

Present results as asked in step 11, 12, 13, 14 and 15.

Step 3: Effect of core saturation on exciting current

Step 1: Single-phase transformer measurements

Draw Figure 3 (as given in lab manual 1). Add proper caption and figure number.

Present results as asked in step 19, 20 and 21.

Answers to review questions

Exercise 2:

Repeat steps as above.

Analysis: *Discuss your understanding of the experiment conducted and results obtained. Even if you find the results are not satisfactory, try to explain the possible reason.*

Conclusion

References

Can be more but at least include one for lab manual.
